Anstett et seq v. ODOC et seq Class Member Notice

READ CAREFULLY

THE CLASS ACTION IS DISMISSED WITH PREJUDICE.

The Class Action law suit involving ODOC's medical treatment of hepatitis C in prisoners. (*Anstett et seq v. State of Oregon USDC Case No. 01-1619*) has concluded. This case was settled in 2004 and is now dismissed with prejudice pursuant to that Settlement Agreement. A copy of the written Settlement Agreement remains available in the law library for review by class members.

United States District Court Judge Anna J Brown together with the Honorable Donald Ashmanskas as Special Master, retained jurisdiction throughout the class action's settlement process. According to the terms of the Settlement Agreement, a panel of outside expert physicians reviewed the ODOC Treatment Guidelines for the medical treatment of hepatitis C infected prisoners and how those guidelines are applied when ODOC provides medical care to the individual prisoners. Their recommendations have been adopted and implemented by ODOC.

Note: ALL Class members are part of the settlement and are therefore prohibited from filing an individual law-suit about either the ODOC Hepatitis C Treatment Guidelines or the application of those Guidelines. These issues were decided by the class action. However, any individual believing that he/she was injured by the way that ODOC treated (or failed to treat) his/her hepatitis C and who wishes to file a separate lawsuit for money damages, may do so by contacting his/her own attorney in a timely manner.
